Secret Lisbon

Where can one find the Avenida Palace Hotel secret passages used by spies during World WarII, and where are they headed to? What are the two masonic columns waiting for on the Tagus River water, in perfect alignment with the D. José I statue and the Rua Augusta arch at Praça do Comércio? How was Martim Moniz able to persuade the moors to open the S. Jorge castle door, during the Lisbon conquer? Why are the ancient underground roman galleries at Rua da Prata, open to the public only 3 days a year? What is the secret of the Senhora do Monte belvedere and why did several queens insist on sitting there? Where is the perfectly intact head of the Águas Livres aqueduct serial killer currently preserved in formol?

The Secret Lisbon app will answer these intriguing questions in an innovative way only possible using the current mobile technologies. These and other insider's secrets will only be revealed to the user, when close to the relevant places.

With this history/technology alliance Secret Lisbon aims to provide an involvement of the user with the most inaccessible corners of the city, otherwise unachievable.
