Through My Eyes

Travelling is a rewarding yet time-consuming task. It involves a lot of planning and research, in order to find the best accommodation, transportation and places of interest available. What if there was an application that would comprise all this information?

Through My Eyes is a Social Trip Planner that simplifies the way to plan a trips, through a crowd-sourced platform that finds, creates and shares itineraries in a drag & drop environment.

Through My Eyes allows users to:

- Search for itineraries created by others, explore places or check for events!
- Create personalized itineraries! Simply by drag & drop, one can build personal itinerary and control Important information such as: budget, weather, distances or mobility.
- Get the best flight and hotels!
- Synchronize a trip with your smartphone and start the adventure. It also enables people to make reviews of itineraries visited during their stay, find the best deals nearby and share the whole experience with friends.
